RELEVANT EXPERIENCES

Tax Technology Intern

EY Smart Future | London, UK | August 2019

- Participated in employability training, interactive workshops and team building sessions to build workplace readiness.
- Needed to adapt quickly to a professional working environment and collaborate with others.
- Assisted with data processing, system testing and documentation, ensuring tasks were completed accurately and on time.
- Contributed to team efficiency and gained practical experience in technology-driven processes.
- Expanded industry knowledge, received guidance on career planning and strengthened confidence in technology roles.

Data Analyst Intern

CVC Capital | London, UK | July 2019

- Searched and analysed industry sectors and trends for the Technology, Media and Telecoms (TMT) team to identify market opportunities and risks.
- Gathered and reviewed industry reports, compared company performance metrics and synthesised insights into clear data-driven findings.
- Tasked with applying insights from cross-functional discussions to improve understanding of business operations and data use.
- Finished with a Dragon's Den-style presentation recommending the most investable company, demonstrating strong analytical reasoning and effective communication to stakeholders.

RELEVANT SKILLS

Analytical Thinking and Problem-Solving

Prisoner Custody Officer (PCO) | Dec 2024 – Present

- There are common delays and changes when it comes to prisoner movements and court schedules, so the ability to assess information quickly is vital for maintaining safe and efficient operations. I evaluated available options, prioritised tasks, liaised with colleagues, and implemented alternative

arrangements. The situation was resolved efficiently with minimal disruption, demonstrating structured adaptability and calm decision-making.

Attention to detail.

Self-Employed Afro-Caribbean braider | Sept 2023 – Dec 2024

- I worked with clients seeking personalised styles. I needed to deliver a high-quality look that matched their expectations and attracted repeat bookings. I used creativity to design custom braid patterns, paid close attention to detail for a clean parting and consistent tension and relied on intuition during consultations to adjust styles based on hair texture and client feedback. This result to high client satisfaction, repeat business and referrals, increasing bookings within my target demographic.

Communication, Teamwork and Collaboration

Waiter/Bartender | July 2021 – Sept 2024

- I was responsible for taking orders, clarifying customer requests, and accurately relaying information to the kitchen and bar staff. I adjusted my communication style depending on the situation, staying calm and clear during busy periods.
- I collaborated closely with colleagues to manage service flow and meet customer demand. My role involved supporting team members, sharing updates, and stepping in when needed to ensure smooth operations.
- I coordinated tasks, communicated timing and priorities and adapted quickly when plans changed.
- Overall, working collaboratively and maintaining open communication, service delays were minimised, orders were processed correctly, reducing misunderstandings and consistently maintaining customer satisfaction.

PROJECTS

- **Rainforest Fire Prediction:** Developed a model to predict rainforest fires using data analysis techniques.
