KEY SKILLS

- **Programming and Web Development:** HTML, CSS, JavaScript, Java, Python, SQL
- **Testing & Quality:** TDD, Unit testing with Jest and Junit
- **Skills:** Agile Methodologies and logical thinking.
- **Tools & Technology:** Jupiter Notebook, Excel and Git (version control)
- **Certifications:** Social Media Marketing

RELEVANT EXPERIENCE

Trainee Software Developer

Northcoders | London, UK | June 2024 – July 2024

- Collaborated through pair programming on a daily basis, developing clear habits around code review, communication and shared ownership of quality.
- Worked in an agile-inspired environment, managing a backlog, running standups and shipping iteratively under time pressure.
- Practised test-driven development throughout, writing tests before implementation as a core discipline.
- Built applications across the curriculum using JavaScript with version control via Git from day one.

Tax Technology Intern

EY Smart Future | London, UK | August 2019

- Participated in employability training, interactive workshops and team building sessions to build workplace readiness.
- Needed to adapt quickly to a professional working environment and collaborate with others.
- Assisted with data processing, system testing and documentation, ensuring tasks were completed accurately and on time.
- Contributed to team efficiency and gained practical experience in technology-driven processes.
- Expanded industry knowledge, received guidance on career planning, and strengthened confidence in technology roles.

Data Analyst Intern

CVC Capital | London, UK | July 2019

- Searched and analysed industry sectors and trends for the Technology, Media and Telecoms (TMT) team to identify market opportunities and risks.
- Gathered and reviewed industry reports, compared company performance metrics, and synthesised insights into clear data-driven findings.
- Tasked with applying insights from cross-functional discussions to improve understanding of business operations and data use.
- Finished with a Dragon's Den-style presentation recommending the most investable company, demonstrating strong analytical reasoning and effective communication to stakeholders.

RELEVANT SKILLS

Leadership, Problem-solving under pressure, Documentation

Prisoner Custody Officer (PCO) | Dec 2024 – Present

- As a PCO, one of my responsibilities is to act as a dock officer. This involves being solely responsible for managing custody transfers by working with court staff, supporting my colleagues and maintaining the court dock order to ensure procedures are followed and the system's structure is upheld.
- When an unexpected situation can quickly escalate, I have to make quick, informed decisions while remaining calm to de-escalate the situation and ensure safety. It is important to avoid imposing risk on myself, my colleagues and those in custody.
- Every incident needs to be recorded and documented, so it is essential to maintain a clear and accurate digital record, as well as complete the necessary paperwork and reports to meet compliance requirements.

Creativity, attention to detail and Intuition

Self-Employed Afro-Caribbean braider | Sept 2023 – Dec 2024

- I worked with clients seeking personalised styles. I needed to deliver a high-quality look that matched their expectations and attracted repeat bookings. I used creativity to design custom braid patterns, paid close attention to detail for a clean parting and consistent tension and relied on intuition during consultations to adjust styles based on hair texture and client feedback. This result to high client satisfaction, repeat business and referrals, increasing bookings within my target demographic.

Social media | August 2023 – April 2024

- While volunteering as a social media officer for an African Caribbean Society, I was responsible for promoting events and increasing member engagement through social media platforms. I created visually engaging and culturally relevant content, ensuring all event details were accurate and consistent. Which required strong attention to detail.
- By monitoring engagement and using intuition to adjust posting styles, timing, and messaging, I tailored content to better resonate with the audience. As a result, engagement across platforms increased and event awareness and attendance improved.

Communication, Teamwork and Collaboration

Waiter/Bartender | July 2021 – Sept 2024

- I was responsible for taking orders, clarifying customer requests, and accurately relaying information to the kitchen and bar staff. I adjusted my communication style depending on the situation, staying calm and clear during busy periods.
- I collaborated closely with colleagues to manage service flow and meet customer demand. My role involved supporting team members, sharing updates, and stepping in when needed to ensure smooth operations.
- I coordinated tasks, communicated timing and priorities and adapted quickly when plans changed.
- Overall, working collaboratively and maintaining open communication, service delays were minimised, orders were processed correctly, reducing misunderstandings and consistently maintaining customer satisfaction.

PROJECTS

- [**Rainforest Fire Prediction \(Data Analysis\)**](#): Developed a model to predict rainforest fires using data analysis techniques.
- [**Pokémon-Battler \(JavaScript\)**](#): Built a web application for Pokémon battles using JavaScript.
- [**Fibonacci-nim Game \(Java\)**](#): Make use of Java methods and class group to build a 2-player game.
- [**Planets & Moons**](#): Using Java test units to ensure each class and method works as intended
